(54) Bidirectional information system and servicing method thereof

(57) A bidirectional information transmitting and receiving system and a servicing method thereof are provided. The bidirectional information transmitting and receiving system includes an information center for collecting, processing, and then transmitting predetermined information provided from the outside in response to an information request signal, an information terminal for outputting the information request signal to the information center and for searching for information received from the information center, a mobile communication terminal for performing wireless

communication with the information center through a mobile communication line to transmit or receive information to or from the information center, and a communication adaptor for relaying information between the mobile communication terminal and the information terminal. According to the present invention, it is possible to maximize the efficiency of a user since it is possible to conveniently use all the information provided by the bidirectional information transmitting and receiving system.
